> Terrible blood poison, body covered with sores, and two bottles of P. P. P. (Prickly Ash, Poke Root and Potassium) cured the disease, making the patient lively as a tenyear-old.

> > MILTON, FLA.

This to certify that I have been afflicted with scrofula or blood poison, for a number of years. The best physicians of Mobile and this city said nothing could be done for me. I also took a large quantity of -, but found no relief anything that I took. My limbs were a mass of ulcers, and when I was sent to a physician in Mobile my entire body was a mass of sores. I had given up all hope, and as a last resort tried P. P. P. (Prickly Ash, Poke Root and Potassium), and after using four bottles (small size) the sores have entirely disappeared, and my general health was never better than at the present time, and people that know me think it a wonderful cure.

# RUTHERFORD COLLEGE.

Burke County, N. C.

The Rutherford College is situated in Burke County, about one mile from the W. N. C. Railroad. The healthfulness of the place is remarkable. The climate is bracing and cool in summer, and protected by surrounding mountains from severe cold in winter. No epidemic has invaded the village in its history. Within ten minutes' walk are the famous Connelly Springs, the waters of which are shipped to Europe, and which are thronged the year round with invalids. Young ladies and gentlemen coming to the College from malarial districts so improve in appearance during the college term that the place has become proverbial as a health resort as well as for its educational facilities. It is a moral place. It is the centre of a local oution township, and all the towns within forty miles are under prohibitory restraints. Board can be had in full for \$8 to \$9 per month: in messing clubs for \$3 to \$5 The Rutherford College is situated month; in messing clubs for \$3 to \$5 Tuition anges from \$2, in Preparatory Department, to \$4, in College classes.
